Measurement data monitoring system testo Saveris™

Automated and uninterrupted measurement data recording

Stationary and mobile data monitoring in one system

Flexible system set-up with wireless or Ethernet probes in many probe versions

Extensive alarm management

Automatic creation of measurement data reports

Integration of other further measurement parameters via standard interfaces

°C

%RH

testo Saveris™:
Easy, secure and efficient measurement data montoring

The data monitoring system testo Saveris measures temperature and humdity values in sensitive goods and products, in the surroundings, in processes and during transport. The easily operated measurement system provides security as well as savings of time and costs thanks to automated measurement data recording. In stationary operation, measurement data transfer takes place by wireless and/or Ethernet connection to a base station. This documents and monitors all measurement data. If limit values are exceeded, a number of alarm options such as SMS/e-mail alarm or alarm relay are available. Remote alarms can also be triggered even when the system is not connected to a running PC. If measurement parameters are documented during transport, the driver receives all necessary information and alarms via a cockpit unit in the driver's cabin. The documentation and monitoring takes place via wireless probes, and a complicated installation of wired sensors in the truck is unnecessary. At the same time, there is the possibility of printing out the measurement data using an infrared printer on site during the handover of goods. All recorded data, whether they are recorded stationary or in transport, are centrally stored in a software. The Saveris software also allows a comprehensive analysis and evaluation of all recorded measurement data. With testo Saveris, all measurement data are under control – stationary and in transport.

Production   Transport   Storage

ICS SCHNEIDER MESSTECHNIK

testo Saveris™ system overview

Data monitoring for uninterrupted control

testo Saveris™ wireless probes

Probe versions with internal as well as external temperature and humidity sensors allow the adaptation to any application. The wireless probes are available optionally with or without display. The current measurement data, the battery status and the quality of the wireless connection are shown.

testo Saveris™ Router

The use of a router can improve or extend the wireless connection in difficult constructional circumstances. Several routers in the testo Saveris system are of course possible. At the same time, the serial switching if up to 3 routers V 2.0 provides the highest level of flexibility regarding wireless range.

testo Saveris™ Converter

By connecting a testo Saveris converter to an Ethernet socket, the signal from a wireless probe can be converted into an Ethernet signal. This combines the flexible installation of a wireless probe with the exploitation of the existing Ethernet even over long transmission distances.

testo Saveris™ Router

testo Saveris™ Converter V 2.0

testo Saveris™ wireless probes

Ethernet

testo Saveris™ Analog coupler (Ethernet)

testo Saveris™ Analog coupler (wireless)

Humidity transmitter

testo Saveris™ analog coupler

The two versions of the analog coupler (wireless/Ethernet) allow the integration of further measurement parameters into the testo Saveris monitoring system, by including all transmitters with standardized current/voltage interfaces, e.g. 4 to 20 mA or 0 to 10 V.

Humidity and differential pressure transmitters testo 6651/6681/6351/6381/6383

By integrating the humidity and differential pressure transmitters, measurement data monitoring parallel to the control is possible. This offers the solution for highest accuracy as well as for special applications, (high humidity, trace humidity etc.) in compressed air, drying and air conditioning technology.
Find out more at www. testo.com

4

testo Saveris™ Base

The base is the heart of testo Saveris, and can store 40,000 measurement values per measurement channel independently of a PC. This corresponds to a storage capacity of approximately a year at a measurement rate of 15 minutes. System data and alarms are visible via the Saveris base display.

testo Saveris™ software

The testo Saveris software offers easy operation as well as an intuitive user interface. The Saveris software is available in three different versions: as a basic version SBE (Small Business Edition), as a PROF version (professional) with many additional options, or as a CFR version. The CFR software fulfils the 21 CFR Part 11 requirements of the FDA, and is thus validatable.

Ethernet

USB or Ethernet

testo Saveris™ software

testo Saveris™ Base

Ethernet

testo Saveris™ Cockpit Unit

testo Saveris™ Ethernet probes

testo Saveris™ Extender

testo Saveris™ Ethernet probes

In addition to the wireless probes, probes can be used which can be directly connected to the Ethernet. This means that an existing LAN structure to be used, allowing the data transfer from probe to base even over large distances.

testo Saveris™ Extender

By connecting a Saveris Extender, the wireless signal of a transport probe (mobile probe) is converted into an Ethernet signal. The data transfer from wireless probe to Extender takes place automatically when sufficient wireless connection is present.

testo Saveris™ Cockpit Unit

The Saveris Cockpit Unit displays all measurement values to the driver uninterruptedly during transport. If limit values are violated, the driver is immediately warned. Alternatively, the complete data recording can be printed out at the handover site of the goods using the Testo printer on the Cockpit Unit.

5

Overview of application areas
for testo Saveris™

Monitoring processes in the pharmaceutical industry

In the pharmaceutical industry, the recording and monitoring of quality parameters is subject to strict requirements. Constant documentation during the production, transport and storage of temperature-sensitive products such as medicines, blood products or cell cultures has long been considered a "must".

testo Saveris automates central documentation as well as safe monitoring in refrigerated or deep-freeze rooms, incubators and climate cabinets. At the same time, the system allows uninterrupted measurement data recording during the transport of temperature- or humidity-critical products such as medicaments or vaccines. testo Saveris thus offers optimum control, from production and storage, via transport, to delivery.

The comprehensive alarm management allows fast alarms if limit values are exceeded. Thanks to the combination of wireless and/or Ethernet probes, the system concept is ideal for many different applications in the pharmaceutical industry. The data monitoring system testo Saveris of course complies with the requirements of 21 CFR Part 11.

Monitoring building climate

Especially in museums and archives, stable ambient conditions are indispensable in the monitoring of building climate, in order to protect sensitive and valuable objects. And during transport too, precious goods must be constantly monitored. testo Saveris automates the central recording of all ambient data, not only stationary, but also during transport.

Thanks to the alarms when limit values are exceeded, testo Saveris protects valuable inventory at all times from undesired temperature or humidity influences. The wireless probes can be flexibly installed at the measurement sites without complicated wiring.

Monitoring of processes in research and development, laboratories and hospitals

Research and development areas as well as laboratories and hospitals are responsible for the recording of ambient and process data, in order to monitor sensitive products or machines. However, the monitoring of temperature- and humidity-critical goods during transport too, is indispensable for a high standard of quality. testo Saveris takes over the central documentation of the measurement series, not only for stationary, but also for transport applications.

testo Saveris thus guarantees the easy and safe monitoring of ambient and process data in climate cabinets, refrigerators, incubators, test benches or blood banks. If critical values are to be monitored during transport, testo Saveris offers the optimum solution.

Overview of application areas for testo Saveris™

Monitoring the food cold chain

The maintenance of pre-defined temperature values is crucial for quality in food production, and important for the fulfilment of legal hygiene standards.The deciding factor. however, is the uninterrupted maintenance of the cold chain during production, storage and above all transport. In the final analysis, only this uninterrupted monitoring guarantees an evaluation of the quality and freshness of the products. testo Saveris automates not only the monitoring of the ambient and product temperatures during production and storage, but also the maintenance of defined temperature limit values during transport. The installation of wireless probes in the truck makes the troublesome wiring of the driver's cabin unnecessary. Alarms are of course immediately triggered when limit values are exceeded.

The measurement data from stationary and transport applications are stored centrally in a database, and are available at any time. All measurement values are thus under control! It goes without saying that testo Saveris complies with the EN12830 standard.

Monitoring in production, storage and transport in industry

A number of quality data must be recorded and monitored in production, storage and transport in industry. testo Saveris automates the documentation of these data and provides alarms when upper or lower limit values are exceeded. The quality of the products and processes is thus guaranteed at a stable level.

testo Saveris is ideally applicable for the monitoring and documentation of ambient and temperature data in production areas, in storerooms, refrigerators and climate cabinets. At the same time, testo Saveris allows the uninterrupted recording of measurement parameters during the transport of sensitive goods.
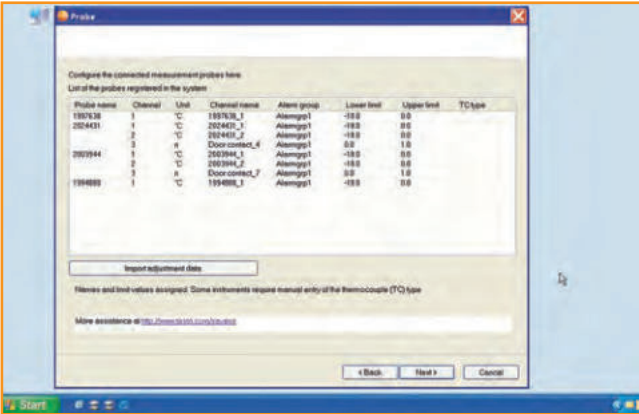

Various applications, stationary as well as in transport, are optimally covered by testo Saveris wireless and/or Ethernet probes.
testo Saveris™ software

1

Installation made easy

· Connect Saveris base to mains. The probes can now be logged on at the base: They are switched on in series and automatically identified by the base.

· The Saveris base is connected to the PC via USB or Ethernet. The software is installed on the PC with help from the installation wizard.

· The system is ready for configuration: Probe name, limit values, measuring cycles and alarms can be adapted to the individual measuring tasks.

2
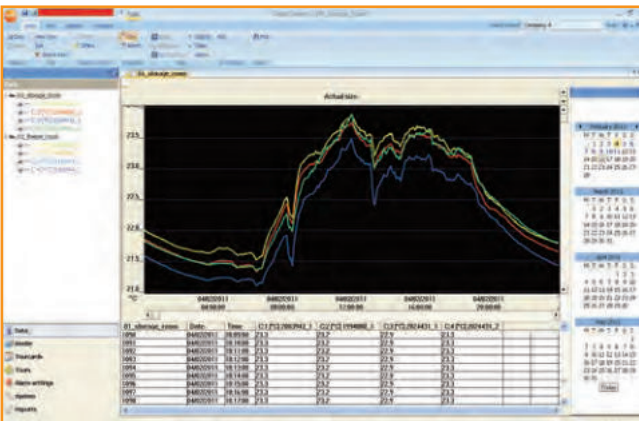

Clear and always up-to-date

· The measurement data can always be shown as a graph or table.

· Various probes can be compiled into groups. Logical units by measurement task are thus formed.

· The measurement data view over days, weeks or months is freely definable. The integrated calendar offers practical assistance here.

3

Automated documentation

· Format and time of the report creation are predefined once.

· The creation and saving of reports as a PDF file now takes place automatically in accordance with the set conditions. The files are therefore ready to be printed at any time.

10

Small Business Edition (SBE), Professional (PROF) and CFR-Version

4

Even more flexible with Professional software

The PROF (Professional) software version offers interesting additional functions beyond the attractive standard functions of the basic version SBE, e.g.:

· Client-server concept: The measurement data can be monitored by various PCs integrated into the network.

· Photographs of machines or rooms can be saved as a picture. The respective measurement values are shown directly at the position of the probe in the room or at the machine in these. The link between the location and the measurement value is thus very easily visualized (fig. 4).

· A comprehensive alarm management offers the option of alarming more than two people at the same time or in succession. Depending on the day of the week or the time, it is possible to choose whether the alarm is given as an e-mail and/or an SMS.

· Tour planning with calendar management allows a clear presentation of planned and completed transports.
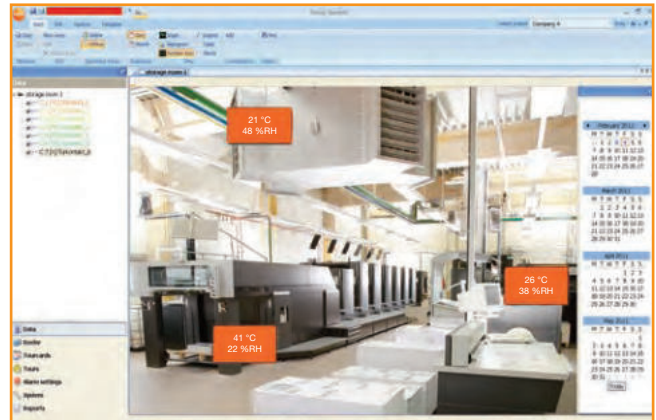

5

Validatable CFR software

The CFR software fulfils the requirements of the FDA's 21 CFR Part 11 and is thus validatable.

testo Saveris™ components:
Router, Converter and Extender

The radio link can be improved or lengthened in poor structural conditions by using a router. Several routers can of course be used in the testo Saveris system. At the same time, the serial switching of up to 3 routers V 2.0 offers highest flexibility in the wireless range.

Through the connection of a converter to an Ethernet jack, the signal of a radio probe can be converted into an Ethernet signal. This combines the flexible connection of the radio probe with the use of the existing Ethernet even over long transmission paths.

By connecting an Extender, the wireless signal of a transport probe is converted into an Ethernet signal. The data transfer from probe to Extender takes place automatically when sufficient wireless connection is present.

The alkali manganese batteries AA (0515 0414) are included in these ordering data (analog coupler excluded). Saveris probes are delivered with a calibration protocol of the factory adjustment data. Calibration certificates must be ordered separately.

1) Not for condensing atmosphere. For continuous applications in high humidity (>80 %RH at ≤30 °C for >12 h, >60 %RH at >30 °C for >12h), please contact us via www.testo.com.
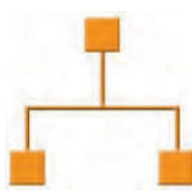

*The Saveris Converter V 2.0 (order no. 0572 0218) is required for integration of Saveris wireless probes into systems with Base Firmware V 1.X . For more information please contact our custo-mer hotline or your Testo partner.

testo Saveris™ components:
Ethernet probes

The existing LAN infrastructure can be used through the Ethernet probe. This allows the data transfer from the probe to the base, even over long distances. Ethernet probes have a display.

Ethernet

		NTC external Saveris T1E Ethernet probe with 1 external probe connection NTC	TC external Saveris T4 E 4-channel Ethernet probe with 4 external TC probe connections		Pt 100 external Saveris Pt E Ethernet probe with external Pt100 probe connection

| Sintered caps for Saveris H1 E, H2 E and H2 D probes	Part no.
Metal protection cage, Ø 12 mm for humidity probes, for measurement in flow velocities of less than 10 m/s	0554 0755
Stainless steel sintered filter, pore size 100 µm, sensor protection in dusty atmospheres or higher flow velocities, for measurements at higher flow velocities or in contaminated air	0554 0647
Cap with wire mesh filter, Ø 12 mm	0554 0757
Sintered PTFE filter, Ø 12 mm, for corrosive media, High humidity range (long-term measurements), high flow velocities.	0554 0756
Testo saline pots for testing and humidity calibration of humidity sensors, 11.3 %RH and 75.3 %RH, incl. adapter for humidity probes, fast testing or calibration of humidity probe	0554 0660

testo Saveris™ accessories:
External temperature and humidity probes

Pt 100	Plug-in probes	Illustration	Measuring range	Accuracy	t_{99}	Part no.	
	Robust, Pt100 stainless steel food probe (IP65)	125 mm / Ø 4 mm / 15 mm / Ø 3 mm — Connection: Fixed cable	-50 to +400 °C	Class A (-50 to +300 °C), Class B (remaining range)	10 s	0609 2272	
	Penetration probe Pt100 with ribbon cable, cable length 2 m, IP 54	60 mm / Ø 5 mm / 30 mm / Ø 3.6 mm	-50 to +180 °C	Class A	10 s	0572 7001	
	Connection cable for unlimited Pt100 stationary probes (4-wire technology), Cable length: 3 m possible max. cable length: 20 m					0554 0213	

TC	Plug-in probes	Illustration	Measuring range	Accuracy	t_{99}	Part no.	
	Stationary probe with stainless steel sleeve, TC Type K	40 mm / Ø 6 mm — Connection: Fixed cable 1.9 m	-50 to +205 °C	Class 2*	20 s	0628 7533	
	Penetration probe TC with ribbon cable, Type K, cable length 2 m, IP 54	60 mm / Ø 5 mm / 30 mm / Ø 3.6 mm	-40 to + 220 °C	Class 1	7 s	0572 9001	
	Magnetic probe, adhesive force approx. 20 N, with magnets, for measurements on metal surfaces, TC Type K	35 mm / Ø 20 mm — Fixed cable	-50 to +170 °C	Class 2*	150 s	0602 4792	
	Magnetic probe, adhesive force approx. 10 N, with magnets, for higher temp., for measurements on metal surfaces, TC Type K	75 mm / Ø 21 mm — Connection: Fixed cable 1.6 m	-50 to +400 °C	Class 2*		0602 4892	
	Pipe wrap probe for pipe diameter 5 to 65 mm, with exchangeable measuring head. Meas. range short-term to +280°C, TC Type K	Connection: Fixed cable 1.2 m	-60 to +130 °C	Class 2*	5 s	0602 4592	
	Pipe wrap probe with velcro strip; for temperature measurement on pipes with diameter up to max. 120 mm; Tmax. +120 °C; TC Type K	395 mm / 20 mm — Connection: Fixed cable 1.5 m	-50 to +120 °C	Class 1*	90 s	0628 0020	
	Thermocouple with TC adapter, flexible, 800mm long, fibre glass, TC Type K	800 mm / Ø 1.5 mm	-50 to +400 °C	Class 2*	5 s	0602 0644	
	Thermocouple with TC adapter, flexible, 1500mm long, fibre glass, TC Type K	1500 mm / Ø 1.5 mm	-50 to +400 °C	Class 2*	5 s	0602 0645	
	Thermocouple with TC adapter, flexible, 1500mm long, PTFE, TC Type K	1500 mm / Ø 1.5 mm	-50 to +250 °C	Class 2*	5 s	0602 0646	
	Immersion tip, flexible, TC Type K	500 mm / Ø 1.5 mm	-200 to +1000 °C	Class 1*	5 s	0602 5792	
	Immersion measurement tip, flexible, for measurements in air/exhaust gases (not suitable for measurements in smelters), TC Type K	1000 mm / Ø 3 mm	-200 to +1300 °C	Class 1*	4 s	0602 5693	

The specified accuracy class of the Saveris radio and Ethernet probe is achieved using these external probes.

*According to standard EN 60584-2, the accuracy of Class 1 refers to -40 to +1000 °C (Type K), Class 2 to -40 to +1200 °C (Type K), Class 3 to -200 to +40 °C (Type K).

NTC	Plug-in probes	Illustration	Measuring range	Accuracy	t_{99}	Part no.	
	Stub probe, IP 54	35 mm / Ø 3 mm	-20 to +70 °C	±0.2 °C (-20 to +40 °C) ±0.4 °C (+40.1 to +70 °C)	15 s	0628 7510	
	Stationary probe with aluminium sleeve, IP 65	40 mm / Ø 6 mm / Connection: Fixed cable; Cable/length: 2.4 m	-30 to +90 °C	±0.2 °C (0 to +70 °C) ±0.5 °C (remaining range)	190 s	0628 7503*	
	Accurate imm./pen. probe, 6m cable, IP 67	40 mm / Ø 3 mm / Ø 3 mm / Connection: Fixed cable; Cable/length: 6 m	-35 to +80 °C	±0.2 °C (-25 to +74.9 °C) ±0.4 °C (remaining range)	5 s	0610 1725*	
	Accurate immersion/penetration probe, cable: 1.5 m long, IP 67	40 mm / Ø 3 mm / Ø 3 mm / Connection: Fixed cable; Cable/length: 1.5 m	-35 to +80 °C	±0.2 °C (-25 to +74.9 °C) ±0.4 °C (remaining range)	5 s	0628 0006*	
	Penetration probe NTC with ribbon cable, cable length 2 m, IP 54	60 mm / Ø 5 mm / 30 mm / Ø 3.6 mm	-40 to +125 °C	±0.5 % of mv (+100 to +125 °C) ±0.2 °C (-25 to +80 °C) ±0.4 °C (remaining range)	8 s	0572 1001	
	Wall surface temperature probe, e.g. to prove damage in building material	Connection: Fixed cable; Cable/length: 3 m	-50 to +80 °C	±0.2 °C (0 to +70 °C)	20 s	0628 7507	
	Stainless steel NTC food probe (IP65) with PUR cable	125 mm / Ø 4 mm / 15 mm / Ø 3 mm / Connection: Fixed cable; Cable/length: 1.6 m	-50 to +150 °C2)	±0.5% of mv (+100 to +150 °C) ±0.2 °C (-25 to +74.9 °C) ±0.4 °C (remaining range)	8 s	0613 2211*	
	Pipe wrap probe with Velcro for pipe diameter to max. 75 mm, Tmax. +75°C, NTC	300 mm / 30 mm / Connection: Fixed cable; Cable/length: 1.5 m	-50 to +70 °C	±0.2 °C (-25 to +70 °C) ±0.4 °C (-50 to -25.1 °C)		0613 4611	

The standard temperature probes from the Testo range can be individually tailored to your application. For more information please contact your Testo partner.

%RH	Plug-in probes	Illustration	Measuring range	Accuracy	Part no.	
	Humidity / Temperature Probe 12mm	Ø 12 mm	-20 to +70 °C 0 to 100 %RH	±0,3 °C ±2 %RH at +25 °C (2 to 98 %RH) ±0,03 %RH/K ± 1 digit	0572 6172	
	Humidity / Temperature Probe 4 mm	Ø 4 mm	0 to +40 °C 0 to 100 %RH	±0,3 °C ±2 %RH at +25 °C (2 to 98 %RH) ±0,08 %RH/K ± 1 digit	0572 6174	

The specified accuracy class of the Saveris radio and Ethernet probe is achieved using these external probes.

* Probe tested to EN 12830 for suitability in the transport and storage sectors
2) Long-term measurement range +125°C, short-term +150°C or +140°C (2 minutes)

testo Saveris™ set

Adjustment

You can assemble all individual components yourself, of course, but you also have the option of ordering a testo Saveris set. This can be supplemented with individual components as required.

Naturally all testo Saveris probes are adjusted in the factory, which is confirmed by an adjustment report. You can perform further calibrations or adjustments either yourself on site, via a service provider or in a calibration laboratory. The separate Saveris adjustment software is available for this. After successful adjustment, the current data is stored in the probe. At the same time, the adjustment software and the Saveris software accept this data so that the adjustment histories are available.

Radio and Ethernet probes are connected to a cable via the service interface for adjustment.

If you do not wish to perform your own calibration, Testo is available as a service provider.

Set: 868 MHz, consisting of base 0572 0220, 3 NTC radio probes without display 0572 1210, mains unit for base 0554 1096 and SBE software 0572 0180 incl. USB cable
Set 868 MHz
Part no. 0572 0210

Saveris adjustment software incl. connection cable for wireless and Ethernet probes
Part no. 0572 0183

Worldwide presence

Testo is a manufacturer of measuring instruments and measuring systems with a global presence, with 31 international subsidiaries and representatives in numerous countries. Naturally, Testo also offers you on-site service. For questions regarding testo Saveris, from installation to retrofitting further system components, please refer to your competent contact in your country.

You can find an overview of the nearest service location at www.testo.com.
