

Submersible pressure sensor High-performance Model LH-20

WIKA data sheet PE 81.56

Applications

- Deep well and borehole measurements
- Groundwater monitoring
- Level measurement in open bodies of water
- Sewage lift and pumping stations
- Settling ponds and rainwater basins

Special features

- Slimline design
- Scalable measuring range (option)
- Resistant against the harshest environmental conditions
- Reliable and secure by double-sealed design
- Titanium case for especially high resistance (option)

Submersible pressure sensor model LH-20

Fig. left: Stainless steel

Fig. right: Titanium

Description

For the most demanding measurement tasks

The model LH-20 submersible pressure sensor has been designed for the most demanding of level measurement tasks. A slimline design, highest accuracies, low temperature errors and an adjustable measuring range ensure the suitability of the LH-20 for all submerged level measurements.

The model LH-20 submersible pressure sensor can adapt to countless applications and measuring media through a large number of features and options. Depending on the requirements, this submersible pressure sensor is available with, amongst other things, a titanium case, PUR/PE/FEP cable, 0.1 % accuracy, HART®, scalability or parallel temperature output signal.

For operation in hazardous environments, the model LH-20 submersible pressure sensor is also available in an intrinsically safe version. For potable and fresh water

applications, a drinking water conformant product variant is possible in accordance with KTW and ACS.

Hermetically sealed, robust and durable

The model LH-20 submersible pressure sensor has been engineered for use in the harshest environments. Through a double, redundant sealing concept, it is permanently hermetically sealed. A robust design from stainless steel or titanium, with a spring-reinforced cable seal, ensures a long service life, even under the big mechanical loads of installation and continuous use.

Designs with the highest media resistance using FEP cable and titanium cases, along with the integrated lightning protection, guarantee the longevity of the submersible pressure sensor even under the most adverse environmental influences in aggressive media, in both indoor and outdoor use.

Measuring ranges

Gauge pressure						
bar	Measuring range	0 ... 0.1	0 ... 0.16	0 ... 0.25	0 ... 0.4	0 ... 0.6
	Overload safety	15	20	30	30	35
	Measuring range	0 ... 1	0 ... 1.6	0 ... 2.5	0 ... 4	0 ... 6
	Overload safety	35	50	50	65	90
	Measuring range	0 ... 10	0 ... 16	0 ... 25		
	Overload safety	90	130	130		
inWC	Measuring range	0 ... 50	0 ... 100	0 ... 150	0 ... 250	
	Overload safety	8,000	12,000	12,000	14,000	
psi	Measuring range	0 ... 5	0 ... 10	0 ... 15	0 ... 25	0 ... 50
	Overload safety	400	500	700	700	900
	Measuring range	0 ... 100	0 ... 160	0 ... 200	0 ... 300	
	Overload safety	1,300	1,900	1,900	1,900	
mH ₂ O	Measuring range	0 ... 1	0 ... 1.6	0 ... 2.5	0 ... 4	0 ... 6
	Overload safety	150	200	300	300	350
	Measuring range	0 ... 10	0 ... 16	0 ... 25	0 ... 40	0 ... 60
	Overload safety	350	500	500	650	900
	Measuring range	0 ... 100	0 ... 160	0 ... 250		
	Overload safety	900	1,300	1,300		

Absolute pressure						
bar	Measuring range	0 ... 1.6	0 ... 2.5	0 ... 4	0 ... 6	0 ... 10
	Overload safety	50	50	60	90	90
	Measuring range	0 ... 16	0 ... 25			
	Overload safety	130	130			

The given measuring ranges are also available in mbar, kPa and MPa.

Output signals

Output signals	
Standard	4 ... 20 mA
Option	4 ... 20 mA and HART® signal, additional Pt100 measuring signal

Load in Ω

The load depends on the selected output signal and measuring deviation (see page 3).

- 4 ... 20 mA with measuring deviation 0.1 %: $\leq (\text{power supply} - 9.6 \text{ V}) / 0.022 \text{ A}$
- 4 ... 20 mA with measuring deviation 0.2 %: $\leq (\text{power supply} - 8 \text{ V}) / 0.022 \text{ A}$
- 4 ... 20 mA and HART® signal: $\leq (\text{power supply} - 9.6 \text{ V}) / 0.022 \text{ A}$

Voltage supply

Power supply

The power supply depends on the selected output signal and measuring deviation (see page 3).

- 4 ... 20 mA with measuring deviation 0.1 %: DC 9.6 ... 30 V
- 4 ... 20 mA with measuring deviation 0.2 %: DC 8 ... 30 V
- 4 ... 20 mA and HART® signal: DC 9.6 ... 30 V

When being operated in hazardous areas, the submersible pressure sensor must be powered via a repeater power supply (see "Accessories").

Additional Pt100 measuring element

The HART® version has an additional Pt100 measuring element for measuring the medium temperature.

- Pt100 per DIN EN 60751
- Measuring range -50 ... +100 °C [-58 ... +212 °F]
- Resolution of 1 °K

Reference conditions

Temperature

15 ... 25 °C [59 ... 77 °F]

Atmospheric pressure

860 ... 1,060 mbar [86 ... 106 kPa /12.5 ... 15.4 psig]

Humidity

45 ... 75 % r. h.

Mounting position

Calibrated in vertical mounting position, with process connection facing downwards.

Accuracy specifications

Measuring deviation at reference conditions

Measuring deviation	
Standard	$\leq \pm 0.2$ % of span
Option	$\leq \pm 0.1$ % of span

By setting a turndown of greater than 5:1, a higher measuring deviation applies.
Measuring deviation determined using the limit point method per IEC 60770.

Temperature error of the zero point in the temperature range 0 ... 80 °C [32 ... 176 °F]

- with measuring deviation $\leq \pm 0.2$ % of span
 - Standard, without turndown $\leq \pm 0.15$ % of span/10 K
 - Turndown $\leq 5:1$ $\leq \pm 0.20$ % of span/10 K
 - Turndown $> 5:1$ $\leq \pm 0.25$ % of span/10 K
- with measuring deviation $\leq \pm 0.1$ % of span
 - Standard, without turndown $\leq \pm 0.05$ % of span/10 K
 - Turndown $\leq 5:1$ $\leq \pm 0.10$ % of span/10 K
 - Turndown $> 5:1$ $\leq \pm 0.15$ % of span/10 K

Long-term drift

$\leq \pm 0.1$ % of span/year

Settling time (0 ... 63 %)

Depending on the output signal the following settling times apply:

- 4 ... 20 mA: 100 ms
- 4 ... 20 mA, HART® signal: 200 ms

Scalability (turndown)

The HART® version enables scaling of the measuring range (turndown).

It is recommended that turndown is not set to over 5:1, since the accuracy can decrease dependant on the scaling.

Operating conditions

Ingress protection (per IEC 60529)

IP68

Immersion depth

to 250 m [820 ft]

Vibration resistance (per IEC 60068-2-6)

4 g (at 5 ... 100 Hz)

Lightning protection

Nominal discharge current ≥ 5 kA, response time < 25 ns

Temperatures

The permissible temperature ranges are dependent on the cable material used:

Medium:	PE cable:	-40 ... +60 °C [-40 ... +140 °F]
	PUR cable:	-40 ... +80 °C [-40 ... +176 °F]
	FEP cable:	-40 ... +80 °C [-40 ... +176 °F]
Ambient:	PE cable:	-40 ... +60 °C [-40 ... +140 °F]
	PUR cable:	-40 ... +85 °C [-40 ... +185 °F]
	FEP cable:	-40 ... +85 °C [-40 ... +185 °F]
Storage:	PE cable:	-40 ... +80 °C [-40 ... +176 °F]
	PUR cable:	-40 ... +80 °C [-40 ... +176 °F]
	FEP cable:	-40 ... +80 °C [-40 ... +176 °F]

Maximum tension force on the cable

1,200 N [270 lbf]

Weight

- Submersible pressure sensor: approx. 370 g
- Cable: approx. 100 g/m [1.08 oz/ft]

Explosion protection (option)

Materials (wetted)

	Standard	Option
Case	Stainless steel 316L	Titanium ¹⁾
Cable material	PUR	PE, FEP
Sealing material ²⁾	FKM	EPDM

1) Not available in intrinsically safe version.

2) The model LH-20 is double sealed behind the sensor.

Sensor

Ceramic Al₂O₃ 96 %

Titanium for especially high resistance (option)

For a particularly high resistance against aggressive media, the model LH-20 submersible pressure sensor is available with a titanium case.

This exceptionally high-quality material enables the submersible pressure sensor to be used under the most adverse conditions.

The highly chemically-resistant titanium design ensures a long service life, even in aggressive media and the most demanding applications.
