

## Dynisco Melt Temperature Probe Series DYMT

### Description

The Melt Thermocouple Series DYMT is especially designed to meet the requirements of the polymer industry. The flexible design of this series allows the use in extrusion and injection molding process.

The mounting thread is compatible with the threads used for melt pressure measurement. Therefore, the DYMT series is ready for use in most extrusion systems.

The blade style thermocouples feature a unique blade design which reduces friction in the melt stream, the special rotation design of the blade allows low friction installation.

The Melt Thermocouple Series DYMT is also available with dual TC or RTD.
